## // CORE COMPETENCIES

- Angular Development & Architecture
- Scalable Frontend Architecture & Modular Design
- Reactive Programming & State Management (RxJS, Signals)
- Object-Oriented Programming (OOP) & SOLID Principles
- Component-Driven Development & Reusable UI Design
- AI-Assisted Development & Agentic AI Workflows
- Unit Testing & Test Automation
- RESTful API Integration & Error Handling
- Responsive UI Development & Cross-Browser Compatibility
- CI/CD & Release Management
- Code Quality, Refactoring & Technical Documentation
- Agile/Scrum & Software Development Lifecycle (SDLC)

## // TECHNICAL SKILLS

**Frontend:** Angular 7–22, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Angular Material

**Architecture:** OOP, SOLID, MVVM, Modular Design, Reusable Components

**Reactive Programming:** RxJS, Angular Signals, State Management

**Visualization:** Highcharts

## // EDUCATION

**B.Tech. (Electronics & Communication Engineering), 2019**
Swami Vivekananda Institute of Science and Technology · Grade 7.79
West Bengal University of Technology (WBUT)

**12th (PCM), 2014** · Tender Heart School, CBSE · 72.20%

**10th, 2012** · DAV Public School, Hehal, CBSE · Grade 8.6

## // CERTIFICATION

**Azure Fundamentals,** Wipro, 2020

## // LANGUAGES

**Languages Known:** English, Bengali & Hindi

## // HOBBIES

Guitar · Cooking · Badminton
PS5 Games · Coding · Photography

Senior Angular Developer with 7 years of experience building enterprise-grade frontend applications, modernizing legacy systems, and designing scalable Angular architectures. Strong expertise in TypeScript, RxJS, OOP, SOLID principles, and MVVM, with a focus on modular design, clean code, and long-term maintainability. Experienced in AI-first engineering, establishing coding standards, orchestrating specialized AI agents, and integrating AI-assisted testing and documentation into development workflows. Combines hands-on technical expertise with module leadership and a strong commitment to code quality, engineering consistency, and reliable software delivery.

## </> PROFILE SUMMARY

- **Angular Developer with 7 years of experience** in Angular 15+, TypeScript, RxJS, and building scalable, modular, and maintainable frontend applications.
- Strong expertise in **software architecture and engineering principles**, including OOP, SOLID, MVVM, reusable components, and clean code practices.
- Experienced in **AI-first development**, leveraging specialized AI agents, automated documentation, AI-assisted unit testing, and coding standards to enhance engineering productivity.
- Proven ability to drive **technical ownership and cross-functional collaboration**, delivering enterprise applications with a focus on code quality, maintainability, and business outcomes.

## </> ACHIEVEMENTS

- Enhanced application usability through responsive UI design, intuitive navigation, and optimized workflows across complex modules.
- Improved development efficiency by implementing reusable Angular components, directives, and shared utilities.
- Strengthened code quality through AI-assisted unit testing, structured test planning, and comprehensive test practices.
- Streamlined technical documentation using AI-assisted generation of flowcharts, class diagrams, and sequence diagrams.
- Established an AI-first development approach for an Angular 22 workflow builder, incorporating specialized AI sub-agents, SOLID principles, MVVM architecture, modern Angular features, standardized coding conventions, and structured code reviews.

## </> WORK EXPERIENCE

### Senior Software Engineer | Quorum, Pune | Jan'26 - current

- Architecting an **AI-first Workflow Builder** using Angular 22, leveraging specialized AI agents, SOLID principles, MVVM architecture, modern Angular features, and standardized coding conventions to ensure scalable, maintainable, and high-quality code.
- Established AI-assisted development workflows incorporating architectural guidelines, code reviews, technical documentation, and coding standards to maintain consistency across AI-generated implementations.
- Worked on **ECCT (Energy Component Configuration Tool)** and **CME (Class Model Editor)**, Excel-like applications supporting configuration and data management workflows.
- Enhanced **ECCT usability** by consolidating functionality from multiple pages into a single-page, tab-based interface, simplifying navigation and improving the user experience.
- Delivered bug fixes, feature enhancements, and functional improvements across ECCT and CME, strengthening application stability and reliability.
- Received a **"Good Job" appreciation token** for resolving multiple issues and delivering quality improvements.
- Contributed to **EC (Energy Component)**, a legacy Java and PL/SQL application, by implementing business logic enhancements and delivering multiple user stories.
- Leveraged **agentic AI workflows** to accelerate Java business logic changes and PL/SQL trigger development, managing database schema changes through Flyway migrations.

### Angular UI Developer | Siemens, Pune | Feb'23 – Jan'26

- Enhanced frontend interfaces across the **SystemOne project**, contributing to ABTSite, ABTGo, BOSS Project Conversion, and the Performance Dashboard.
- Led development and optimization of key **ABTSite modules**, including View Favorites, KNX PL-Link, MBus, and Function Configuration, and built the Plant Configurator module from the ground up.
- Refactored and optimized the **Query Generator (Building X)** application using OOP, SOLID principles, and RxJS patterns, improving code modularity, maintainability, and development efficiency, achieving a **30% reduction in technical debt**.
- Developed an **AI-powered chatbot using GPT-4 and Copilot**, incorporating task management capabilities and emotion-aware interactions to enhance user engagement.
- Leveraged AI-assisted tools to generate technical documentation, including flowcharts, class diagrams, and sequence diagrams, streamlining documentation workflows.
- Implemented AI-assisted unit test generation workflows to improve test coverage, accelerate test development, and strengthen code quality.

### Senior Software Engineer | LTIMindtree Ltd. | Aug'21 – Feb'23

- Developed **enterprise-grade Angular applications** from the ground up, delivering scalable, responsive, and maintainable frontend solutions for global clients.
- Developed a **TVS Motors Profit Improvement Plan (PIP) application from the ground up in just over one month**, delivering core functionality within an exceptionally tight timeline.
- Contributed extensively to **EPOS Manager (Sennheiser)** across multiple modules, delivering complex features, business logic, and UI enhancements aligned with project requirements.
- Proactively picked up and completed **backlog user stories ahead of scheduled sprints**, accelerating delivery and helping maintain development momentum.
- Developed interactive data visualizations using **Highcharts**, translating complex business data into clear, actionable visual representations.
- Applied **OOP principles, strong TypeScript typing, and reusable component-based architecture** to improve code quality, maintainability, and consistency.
- Implemented responsive interfaces, form validations, authentication mechanisms, and REST API integrations to deliver reliable experiences across desktop and mobile platforms.
- Wrote **unit tests** for implemented features to validate business logic, improve reliability, and reduce regression risks.
- Participated in requirement analysis and technical design discussions, translating business needs into maintainable frontend solutions while adhering to coding standards and performance best practices.
- Contributed throughout the **Software Development Life Cycle (SDLC)**, including development, testing, deployment, and production support, ensuring timely project delivery.
- Earned **4 performance awards across 2 consecutive quarters** for contributions to EPOS Manager (Sennheiser), recognizing consistent delivery, technical excellence, and commitment to project success.

### Project Engineer – Module Lead | Wipro Ltd. | Oct'19 – Aug'21

- Implemented complex business logic, client-side validations, and REST API integrations to deliver robust application functionality and improve user experience.
- Led module-level development activities, coordinating task allocation, tracking progress, and driving timely delivery through successful SIT and UAT cycles.
- Collaborated with release management teams to streamline deployments across SIT and UAT environments, ensuring smooth rollouts and minimizing service disruption.
- Progressed from Prototype Developer to **Angular Developer**, contributing to key modules including PVU, Budget, and EDP, while leading development of the DDO module.
- Enhanced ROP sub-module interfaces and validation workflows, improving usability and reducing user errors.
- Developed reusable components and directives for the Budget module, reducing code duplication and accelerating feature development.
- Automated workflows and resolved high-priority defects in the EDP module, supporting timely UAT completion and effective defect resolution.
- Led DDO module development and release coordination, aligning cross-functional teams to meet delivery milestones and maintain quality standards.
- Designed a **configurable, component-driven UI framework** that decouples screen layouts into reusable modules and supports dynamic field visibility, validation rules, and default value assignment.
- Implemented a centralized configuration service to dynamically control UI behavior and DOM rendering based on contextual view parameters, improving flexibility and maintainability.

## </> PROJECTS

### AI-first Workflow Builder

- Architecting an enterprise workflow builder using **Angular 22**, with a focus on scalable architecture, modular design, and maintainable code.
- Applying **OOP, SOLID, and MVVM principles**, with standalone components, Signals, zoneless change detection, injectable ViewModels, and InjectionToken-based dependency injection.
- Establishing an **AI-first development workflow** using specialized AI sub-agents, defined coding conventions, architectural rules, and structured code reviews.
- Implementing HTTP interceptors, centralized error handling, and comprehensive technical documentation to improve reliability and maintainability.

### ABTSite (Smart Building – Automation Building Tools)

- Enhanced Angular-based frontend applications across the **SystemOne project**, including ABTSite, ABTGo, BOSS Project Conversion, and Performance Dashboard.
- Designed and developed critical **ABTSite modules**—View Favorites, KNX PL-Link, MBus, and Function Configuration—and built the **Plant Configurator** module from the ground up.
- Refactored and optimized the **Query Generator (Building X)** application, improving code maintainability, modularity, usability, and scalability, with a **30% reduction in technical debt**.
- Applied **OOP, SOLID principles, and RxJS reactive programming patterns** to streamline application logic, optimize data flows, and improve code quality.
- Developed an **AI-powered chatbot using GPT-4 and Copilot**, incorporating intelligent task management and emotion-aware interactions to enhance user engagement.

### TVS Motors – PIP Application

- Developed the **TVS Motors Profit Improvement Plan (PIP) application from the ground up**, implementing complex business logic and secure authentication for leading two- and three-wheeler manufacturers.
- Designed and developed **responsive, mobile-friendly interfaces** to ensure consistent functionality and usability across desktop and mobile platforms.
- Integrated **RESTful APIs** to enable reliable data exchange, streamline application workflows, and enhance overall performance.
- Applied **OOP principles and modular design practices** to structure profit-improvement suggestions, streamline review and approval workflows, and improve maintainability.

### Sennheiser Migration to Angular 11 (EPOS Manager)

- Led the migration of a **legacy AngularJS 1.x application to Angular 11**, modernizing the frontend architecture and improving maintainability.
- Implemented complex business logic and **RESTful API integrations** to enhance application functionality and data flow.
- Applied **OOP principles and robust validation mechanisms** to maintain data integrity and deliver a consistent user experience.
- Developed and executed **unit tests using Jasmine and Karma** to validate functionality, detect defects, and maintain code quality.
- Built **dynamic, interactive data visualizations using Highcharts**, transforming complex datasets into meaningful insights for end users.

### IFMS (Integrated Finance Management System – Government of Gujarat)

- Served as **Module Lead**, overseeing end-to-end delivery, task allocation, effort estimation, progress tracking, and prioritization to meet project deadlines.
- Coordinated with business analysts, QA engineers, and cross-functional teams to clarify requirements, resolve dependencies, and ensure successful SIT/UAT releases.
- Conducted code reviews, enforced coding standards, guided developers, and resolved technical blockers to maintain code quality and delivery timelines.
- Progressed from **Prototype Developer to Angular Developer**, contributing to key IFMS modules, including PVU, Budget, EDP, and DDO.
- Developed business logic, robust validations, and REST API integrations to improve application functionality, reliability, and data integrity.
- Built reusable Angular components and directives for the Budget module, reducing code duplication and improving maintainability.
- Resolved critical defects and enhanced EDP workflows, supporting release readiness and successful testing cycles.

## </> AWARDS

### Star Award – Siemens

Awarded for exemplary contribution in presenting and applying SOLID principles.

### Top Performer Award – Wipro

Recognized for exceptional overall performance, awarded in two quarters.

### Top Performer Award – LTIMindtree (Sennheiser / EPOS Manager Project)

Honored four times in a row for outstanding project-specific performance & high-quality delivery.

### Good Job Appreciation – Quorum Software

Received recognition for successfully resolving multiple issues and delivering quality improvements.
